Precautions for use

1. Storage

（1）The best Storage environment： temperature :5°C~30°C ， Humidity:40% -80%HR

（2）LED store after six months to be re-spectral color separation，to prevent the LED optical properties change

2. Production and application

（1）need wear gloves when contact with led to prevent oxidation

（2）ESD protection to be good

（3）soldering：the pc type can use soldering iron，（the best temperature is 300℃/3sec）also can use Temperature Platform （150℃/30sec,max）the silicone type can use reflow soldering in addition to soldering iron and Temperature Platform

（4）about Package-type silicone ， It is recommended to bake before soldering when the pack is unsealed after 24h。The conditions are as following： 80℃ 4-6h。

（5）must have a good heat sinking，the temperature of the heat sink must be below 65 degree

3.Relow temp/time
